

Feb 03 – Aug 2003 Investors Group

On contract in Winnipeg, MB
Senior Systems Analyst – contract position.

- Provided System analysis, design, coding and testing to support new development, maintenance and changes of Production systems.
- Coding in ADABAS/Natural. All phases of System Testing.
- Created technical documentation according to IEEE standards – Test scripts, Test plans, Design document, Standardized testing plan, System test plan.

Feb 01 – Mar 2002 CalPERS - California Public Employees Retirement Systems

On contract in Sacramento, CA, USA
Senior Systems Analyst – contract position.

- Provided System analysis, design, coding and testing to support new development, bridging between different environments and existing Production systems. Coding in COBOL and ADABAS/Natural. All phases of System Testing. Implementation date Feb 2002.
- Created technical documentation according to IEEE standards – Test scripts, Test plans, Design document, Standardized testing plan, System test plan.

Oct 99 – Aug 2000 CEP - Computer Extension Professionals, Columbia, SC

On contract in Louisville, KY, USA
Senior Systems Engineer – contract position.

- Provided System analysis, design, coding and testing to accommodate a version of a product changes and enhancements to be applied to 47 different systems to accommodate a version of a product. ADABAS/Natural, Easytrieve +
- Created technical documentation such as - Design document, Standardized testing plan, System test plan. Researched over 500 programs and modules.
- Conducted system wide tests of both online and batch modules, as well as complete production run with users.
- User acceptance testing and problem log.

April 99 – July 99 Suncor Energy, Oil Sands Group, Calgary, Alberta

Senior System/Analyst – contract position.

- Data conversion project. Provided storage, retrieval, and conversion of mainframe data for Y2K/mainframe shutdown project. The mainframe was to be turned off on July 30th, 1999.

Sept 98 – Feb 99 Alberta Treasury Branches, Calgary, Alberta

Senior System/Analyst – Team Leader - contract position.

- Data conversion project to follow Y2K standards.
- Y2K related project to convert microfiche processing to OD/390 online report storage facilities for Banking and other systems. Provided recommendations on paperless office and data processing.
- Developed plan and timeline for implementation.
- Evaluated skills and development needs team members. Supervised training. Designed a career development and training plan for team members.
- Change Control using ENDEVOR. Apply changes and clean up JCL, PROC, libraries and scheduling systems.

Nov 96 – Aug 98 City of Calgary - Data Processing Department, Calgary, Alberta

Senior System/Analyst - Project 2000 - Date conversions.

- Y2K - Payroll system. ADABAS files and data conversion. Data verification. Y2K conversion of Accounting system.
- Implemented and tested changes to ADABAS files and COBOL, NATURAL and EASYPLUS programs.
- Coordinated updates with users in different departments and different systems. User acceptance testing. Problem log and problem resolution planning.
- Supported Junior programmers. Worked on redevelopment of Invoicing system. Excellent rapport with users.

June 96 - Nov 96 Trans Canada Pipe Lines, Calgary, Alberta

System/Analyst - Systems Support.

- Created and implemented data interfaces between MATRIX system (SYBASE) and NATURAL systems for Gas nominations and gas contracts updates and processing. Programming in NATURAL (version 1.4) and DCL.
July 95 - June 96 CTC - Computer Tech Consultants, Calgary, Alberta
Contract at Nova Gas Transmissions Ltd., Calgary,
System/Analyst - Systems Support
- Supported clients of Human Resources and Payroll Systems.
- Developed and implemented data load for interface with new SAP project.
- Installed new releases of payroll software and tax updates. Provided System Analysis, Ad-Hoc reporting and GRA (general rates application) reporting support.
- Worked on conversion of payroll data for unionized employees from Royal bank payroll to monthly MSA Payroll (Dun & Bradstreet Software).
- Programming in NATURAL, PL/I, unit and system testing.

Oct 94 – July 95 Alberta Education, Edmonton, Alberta

System/Analyst - Contract position

- Worked on implementation of new features for school grants and marking systems.
- Created new Help screens.
- Programming in ADABAS/NATURAL, unit and system testing.
- Develop and update Online screens and new Forms printing procedures.

March - May 94 DMR Group Inc., Edmonton, Alberta.

at Agriculture Financial Services Corporation, Camrose, Alberta
Programmer/Analyst - Systems Support

- Worked on conversion of NATURAL code from reporting to structured mode for transfer from mainframe to AIX system.
- Programming in NATURAL, unit and system testing.

March - April 93 DMR Group Inc., Edmonton, Alberta.

at Alberta Transportation, Edmonton, Alberta
Programmer/Analyst

- Updates to Commercial Licensing subsystem of MOVES.
- Code changes, laser forms changes, testing. Programming in COBOL and NATURAL.

Sept. 90 - July 92 CACI Systems and Technology Inc., Edmonton, Alberta.

System/Analyst - Systems Development

- Developed and enhanced programs for new motor vehicle information system (MOVES) for the state of Vermont, including Finance, Operators, Accident reporting, Vehicle registration and titles, Client information subsystems.
- Tested Subsystems, review code and support users.
- Implemented standards of coding and documentation. Implementation date Nov. 92.
- Programming in COBOL and NATURAL.

Aug. 87 - Mar 90 PCL Constructors Inc., Edmonton, Alberta.

Programmer/Analyst - Systems Development /Application Support Groups

- Developed and maintained projects in payroll using INTEGRAL SYSTEMS payroll/personnel package.
- On-call support of Salary and Hourly multiple companies payroll processing for Canada and USA.
- Developed and maintained new and existing payroll programs and reports, including WCB reporting.
- Provided user training in ASAP (report writing procedural language) from ISI.
- Liaison with the users in Head Office (Payroll, Accounting, etc.), and the users in the 17 remote districts. Payroll users support.
- Production scheduling (JCL changes, Nightly Production Schedule), change controls and training of replacement personnel.

May 87 - Aug. 87 Technical Service Council, Edmonton, Alberta

Personnel Consulting firm - Computer administrator

- Developed and maintained Data Base and Spreadsheet projects for the Applicant and Client tracking and automated search system using integrated package SMART on COMPAQ PC

Nov 84 - May 85 Becker, ElZein & Associates Ltd., Edmonton, Alberta.

Consulting & Investigative engineers - Junior Engineer/Programmer

- Responsible for programming of engineering related problems, mainly computer simulation of motor vehicle accident reconstruction.
- Evaluated new software, word processing, Electronic Spreadsheet, General Ledger. Reported to the manager.

EDUCATION

- Sept. 86-87 Additional courses at Computer Systems NAIT, Edmonton, Alberta.
- 78- 83 M.Sc., Electronics Engineering, Polytechnical Institute, Lvov, Ukraine.
Maintained 80% average. Course work included upgrading of the magnetic tape peripherals, FORTRAN programming.
- May 78 High School Diploma, High School #9, Lvov, Ukraine.
Average 95%. Honors in Math, Chemistry and English.

ADDITIONAL TRAINING AND SEMINARS

1. Dealing with people - Seminar - Dr. Paul Douglas.
2. Teamwork - you and your boss. - One day seminar - NAIT
3. Time management - One day seminar - NAIT

INTERESTS AND ACTIVITIES

Languages - Ukrainian, Russian, English, Arabic, understand Polish.
Reading, skating, badminton, yoga, backgammon, traveling.

Throughout high school and university was involved in coordinating and managing cultural activities of students such as theater, cinema and museum tours and camping trips.
